ENTERPRISE APPLICATION MANAGEMENT

SOLVE APPLICATION DEPLOYMENT AND MAINTENANCE ISSUE

SILENT INSTALLATION/UPGRADE

Batch application deployment without user interaction, improve the efficiency and save money.

APPLICATION BLACKLIST/WHITELIST

Regulate what applications could be used by end users, manage user behavior.

ENTERPRISE APPLICATION STORE

Alternate way for application deployment, user could install applications as required.

REMOTE APPLICATION UNINSTALLATION

Administrator could uninstall certain application remotely when necessary.

MOBILE SECURITY MANAGEMENT

SOLVE ENTERPRISE MOBILE NETWORK SECURITY ISSUE

NETWORK FIREWALL

Firewall is one of our security components, it's a blacklist of application access network and URL browsing.

SAFE BROWSER

A manageable browser could be used in Kiosk mode, network browsing could be managed through URL blacklist and whitelist policy.
